## ▶ PRODUCT OVERVIEW

Kontron TRACe V304-TR is an EN50155 compliant<sup>(\*)</sup> fanless Network Video Recorder. This "V" version is specifically designed for rolling stock IP video surveillance. The V304-TR version is based on an Intel® Atom E3845 quad-core @ 1.91 GHz Bay Trail processor. Kontron TRACe V304-TR features a wide range power supply (from 24 VDC to 110 VDC). EN50155 certified TRACe V304-TR box recorder is designed to provide high performance, high reliability and high capacity data storage in rough railway environments.

This NVR (Network Video Recorder) features three independent networks (2x LAN with M12 connectors, 1x Wi-Fi) for multiple IP cameras video streams. TRACe V304-TR embeds a soldered 8 GB SLC Flash and provides a SSD/HDD tray allowing up to two removable 2.5" SATA disks. Thus, TRACe V304-TR offers RAID 0 and RAID 1 functions for data reliability. These features enable an immediate deployment for any rolling-stock network CCTV applications.

Its front plate is dedicated to the operational connectors (certified I/O according to EN50155 standard: Ethernet, Serial ports, Audio, Digital Inputs and Outputs) whereas the rear plate hosts maintenance connectors (DisplayPort, USB, Serial,

Ethernet). On this plate, two SMA connectors allow the routing of Wi-Fi signals (antennas non-provided). To prevent unauthorized access via Wi-Fi, advanced 802.1X authentication is available to provide high network security.

General Purpose Inputs/Outputs allow to trigger recordings on the basis of input events (but also to generate output events) whereas the audio interface (Stereo Line In, Stereo Line Out) enables audio recording and transmission.

TRACe V304-TR has been designed to support a comprehensive health management capability, thanks to sensors and a microcontroller for system health monitoring.

The integrated microcontroller monitors boards and inbox ambient temperature, voltages, current and even manages Vital Product Data (P/N, S/N, EC Lvl...) of main components.

Health management middleware by Kontron covers all the vital resources of TRACe™ to report, log, and transmit any out of specs parameters and/or any failures at power-on and during operations of TRACe V304-TR.

<sup>(\*)</sup> Conformal coating of internal components is optional.
